CRA Technical Panel members:

The RAF CRA Panel has received comments and suggestions collected by Lou D'Amico, RAF Ex.Dir., on how CRA is described and characterized in the Guidelines. Lou discussed the current draft of the Guidelines with sr. scientists and risk assessors across EPA in preparation for moving them forward to the STPC for concurrence to release for public comment. We've discussed with Lou what he's hearing from people and agree that a relatively discrete edit to language in the draft Guidelines will improve the likelihood of STPC's approval for public comment. You may recall that the STPC agreed to release the existing draft rather than send it back to

the Panel for a revision to fully address the comments received from the RAF review. Even so, we now perceive that some targeted edits will be necessary – details below.

The next step is for a self-selected writing team from the technical panel to work with us to make some targeted revisions to the draft, and to then circulate a revised draft to the full Panel for concurrence. The revision will be completed no later than May 20, and finalization by the Panel no later than May 27. We will schedule a Panel mtg. for the week of May 23 to get Panel chop-off. Any necessary further tinkering will occur prior to May 27<sup>th</sup>. If you would like to participate and can free a modicum of time over the next 9 working days please send reply to [Martin.Lawrence@epa.gov](mailto:Martin.Lawrence@epa.gov) by COB today, Tuesday May 10. A staff revised draft will be circulated May 11 with text flagged for attention.

Here are points that we need to address in the revision.
